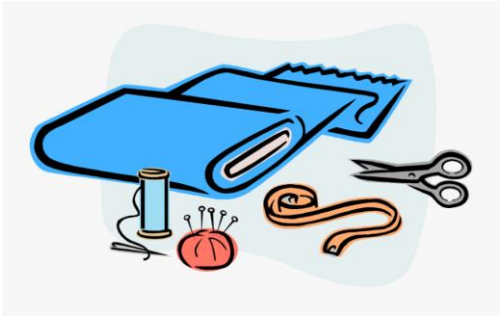
What makes a **FOURFIELDS** Designer?

Follows an iterative (experimental) approach to design technology, which is accepting of problems and works to resolve them.

Uses the principles of a healthy and varied diet to prepare and cook savoury and sweet

Is inquisitive about inventors, designers, engineers, chefs and manufactures who have helped shape the world around them.



Evaluates their ideas and products against their own design criteria and identifies strengths and areas for development with the consideration of the views of others.

Selects from and uses a wide range of materials and components.

Communicates their ideas through talking (using appropriate technical vocabulary), drawing, templates, diagrams, mock-ups and, where appropriate, information and communication technology

Uses a range of tools and equipment to perform practical tasks.

Uses existing products and where relevant research to develop design criteria that informs the design of **innovative**, functional, appealing products that are fit for purpose, aimed at particular individuals or groups
